DOUBLE PEONIES

Peonies are best when planted in the fall when the plants are mature and the roots in prime condition. Plant in a well drained location and plant so that the eyes will be about 2 inches below the surface. Avoid deep planting as this sometimes causes blind growth. After the ground freezes, cover the new plantings with straw, leaves or other litter to prevent heaving by frost.

The figures following the names of each variety are the ratings as established by the American Peony Society.

We offer strong 3 to 5 eye divisions of the following varieties.

Baroness Schroeder, 9.0Opens flesh white changing to creamy white	.75 each
Felix Crousse, 8.4Dazzling ruby-red.....	.75 each
